

# A E S M

## A versatile sanding tool for most lacquer applications.

*In the furniture and wood processing industry the demand for finer and more beautiful surfaces continues, and as such, the importance of surface treatment and lacquer sanding is growing. Ekamant is acknowledged as developing high quality sanding materials to answer these demands.*

- AESM has been designed to meet the demands of most lacquer sanding applications. Silicon carbide grain is fixed to a pliable paper backing with a specially designed bond system which achieves flexibility and sanding efficiency in this product.
- AESM is further treated with a stearate coating which effectively reduces clogging problems and contributes to an improved surface finish.
- Ekamant - the inventor of antistatic abrasive materials, continues to develop this technology giving improved antistatic qualities for AESM. Our clear leadership in this field results in even better sanding economy and working environment.

Backing material	E-paper
Type of grains	Silicon carbide
Coating	Open
Binder	Resin over glue
Antistatic treatment	Yes
Stearated	Yes

Item	standard
Narrow belts	Yes
Wide belts	Yes max 1350 mm
Rolls	Yes
Discs	No
Sheets	No
