

Ekablue

A pliable sanding tool for hand and portable machine sanding.

In the furniture industry the demand for finer and more beautiful surfaces continues, and as such, the importance of surface treatment and lacquer sanding is growing. Ekamant is acknowledged as developing high quality sanding materials to answer these demands.

- EKABLUE has an open coating of aluminium oxide on a pliable and strong paper backing, and is used for hand sanding as well as portable sanding machines.
- EKABLUE has a resin-over-resin binder specially designed for excellent adhesion of the sanding grains to the backing material.
- EKABLUE is treated with a stearate coating, in grits 150 and finer, which together with the open grain distribution, effectively reduces clogging problems. The stearate layer also contributes to an improved surface finish.
- For a more aggressive sanding tool we recommend EKABLUE in the grits 40 - 120, without stearate.

Backing	B-paper 100 - 600, C-paper 40-80
Type of grains	Aluminium oxide
Coating	Semi-open
Binder	Resin over resin
Antistatic treatment	No
Stearated	Yes, grits 150 and finer

Items	standard
Narrow belts	No
Wide belts	No
Rolls	Yes
Discs	Yes
Sheets	Yes
