

RSBN

A pliable lacquer sanding tool for hand and portable machine sanding.

In the furniture industry the demand for finer and more beautiful surfaces continues, and as such, the importance of surface treatment and lacquer sanding is growing. Ekamant is acknowledged as developing high quality sanding materials to answer these demands.

- RSBN has an open coating of silicon carbide on a pliable and strong paper backing, and is used for hand sanding as well as portable sanding machines.
- RSBN has a resin-over-resin binder specially designed for excellent adhesion of the sanding grains to the backing material.
- RSBN is further treated with a stearate coating which together with the open grain distribution, effectively reduces clogging problems. The stearate layer also contributes to an improved surface finish.

Backing material	B-paper
Type of grains	Silicon carbide
Coating	Open
Binder	Resin over resin
Antistatic treatment	No
Stearated	Yes

Items	standard
Narrow belts	No
Wide belts	No
Rolls	Yes
Discs	No
Sheets	Yes
